

Bexley Park Aged Care for Kennedy Healthcare

Project Designer: Trina Kazi / Gilmore Interior Design

Space Planning & Consultancy: Crown Furniture

Furniture: Crown Furniture

Service was outstanding, all around, and the quality of the furniture is also great.

Kennedy Healthcare

Crown Furniture was contacted by Gilmore Interior Design about a new project in which we would have the opportunity to collaborate on together.

Without knowing who our client was we presented a portfolio of recent projects, budget proposal and samples of the chosen furniture. This allowed our customer to see and try before purchasing for peace of mind. It wasn't just a pretty picture

After a phone call from Kennedy Healthcare who were impressed with our presentation and flexibility, we got down to the finer details, proving the value of our expertise.

The space was checked and measured. A walk through was also done, chalking in the areas to demonstrate the furniture would fit, once again providing peace of mind.

Alternate fabrics were sourced to replace those which had been discontinued, and at all times we were only a phone call away.

We place strong emphasis on quality and style. With this in mind spaces were planned for optimum function while also being visually pleasing, providing a quality lifestyle for the residents to enjoy.

We firmed up our quotation by looking at our budget proposal to make sure any savings that could be made were taken into consideration, working closely with our customer to meet their budget.

Our service and interest in the project did not end when the order was received.

The furniture was delivered and placed according to the plans, working closely with our consultant to ensure our customer was more than happy.
