

# Inspiring Living

# Welcome to Crown Furniture

**We design Fit for Purpose furniture  
for those who need and deserve it most.**

From seat height to lumbar support and flame retardant materials to radius corners, we consider everything. It's all part of understanding style, elegance, and quality craftsmanship.

We manufacture using European Hardwoods, which are superior in strength and durability. It's all part of our commitment to creating truly Fit for Purpose furniture, that will stand the test of time.

# Design Tips

- 1 Patterned fabric that might be confusing for the resident, can be applied to the outer back and arms of lounges where it isn't so obvious but still adds a design element to the space.

- 2 Clear definition between the lounge seat and arm can help vision impaired residents to identify the seat, this can be with contrast piping.

- 3 For a better resident dining experience, contrast the fabric with the timber frame and the frame with the floor to clearly define the chair.

- 4 Have a mix of moisture resistant fabric and vinyl with the appearance of fabric, in common areas to give carers a choice based on the resident needs.

- 5 Use fabric with a textured multi coloured appearance which is more forgiving to general wear.

# Australian Manufacturing

**Crown Furniture proudly champions Australian manufacturing, dedicated to crafting top-quality, locally made furniture.**

Our commitment extends to fostering local talent and craftsmanship, evident in our apprenticeship programs. Embracing new technologies enhances local efficiencies, ensuring future growth within the Australian furniture manufacturing industry.

By choosing Crown Furniture, you support and contribute to the resilience of the Australian economy.

# Sustainability

**Committed to responsible manufacturing, Crown Furniture prioritises sustainability.**

We prioritise eco-friendly practices, sourcing materials responsibly, and employing innovative techniques to reduce our environmental footprint.

Our factory and head office utilise solar power, reducing our carbon footprint. We recycle manufacturing byproducts, including plastic waste and foam, and donate excess fabrics to local TAFEs. Annually, we recycle up to 37.5 tonnes of woodwork scraps, contributing to environmental conservation.
