Fit for Purpose Furniture

About Us

**We've been crafting
furniture for over 20 years.**

In those years a lot has changed; we've developed new products, new processes, and forged new markets.

But, one thing has always remained the same – our promise to deliver products that will help you to provide the best quality of care to your patients.

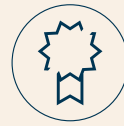

Our Service Commitment

Crown Furniture is a third generation family-owned business. We care for our customers and their needs as if they were our own family. We include the following as part of our service to you:

AUSTRALIAN MADE AND OWNED

Our team has extensive experience in furniture and cabinet making. We are skilled craftsmen who advise on best practice and best design, for every situation.

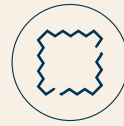

OUR QUALITY STANDARDS

At Crown Furniture we pride ourselves on quality, that's why we work to the best in Australian standards in compliance & warranty guarantee.

OUR GUARANTEE

We offer a structural warranty, however coverage may be limited or altered based on the environment in which the product is used.

CHOOSE YOUR FINISHES

We offer an interior design service to develop your space through our expertise and knowledge.

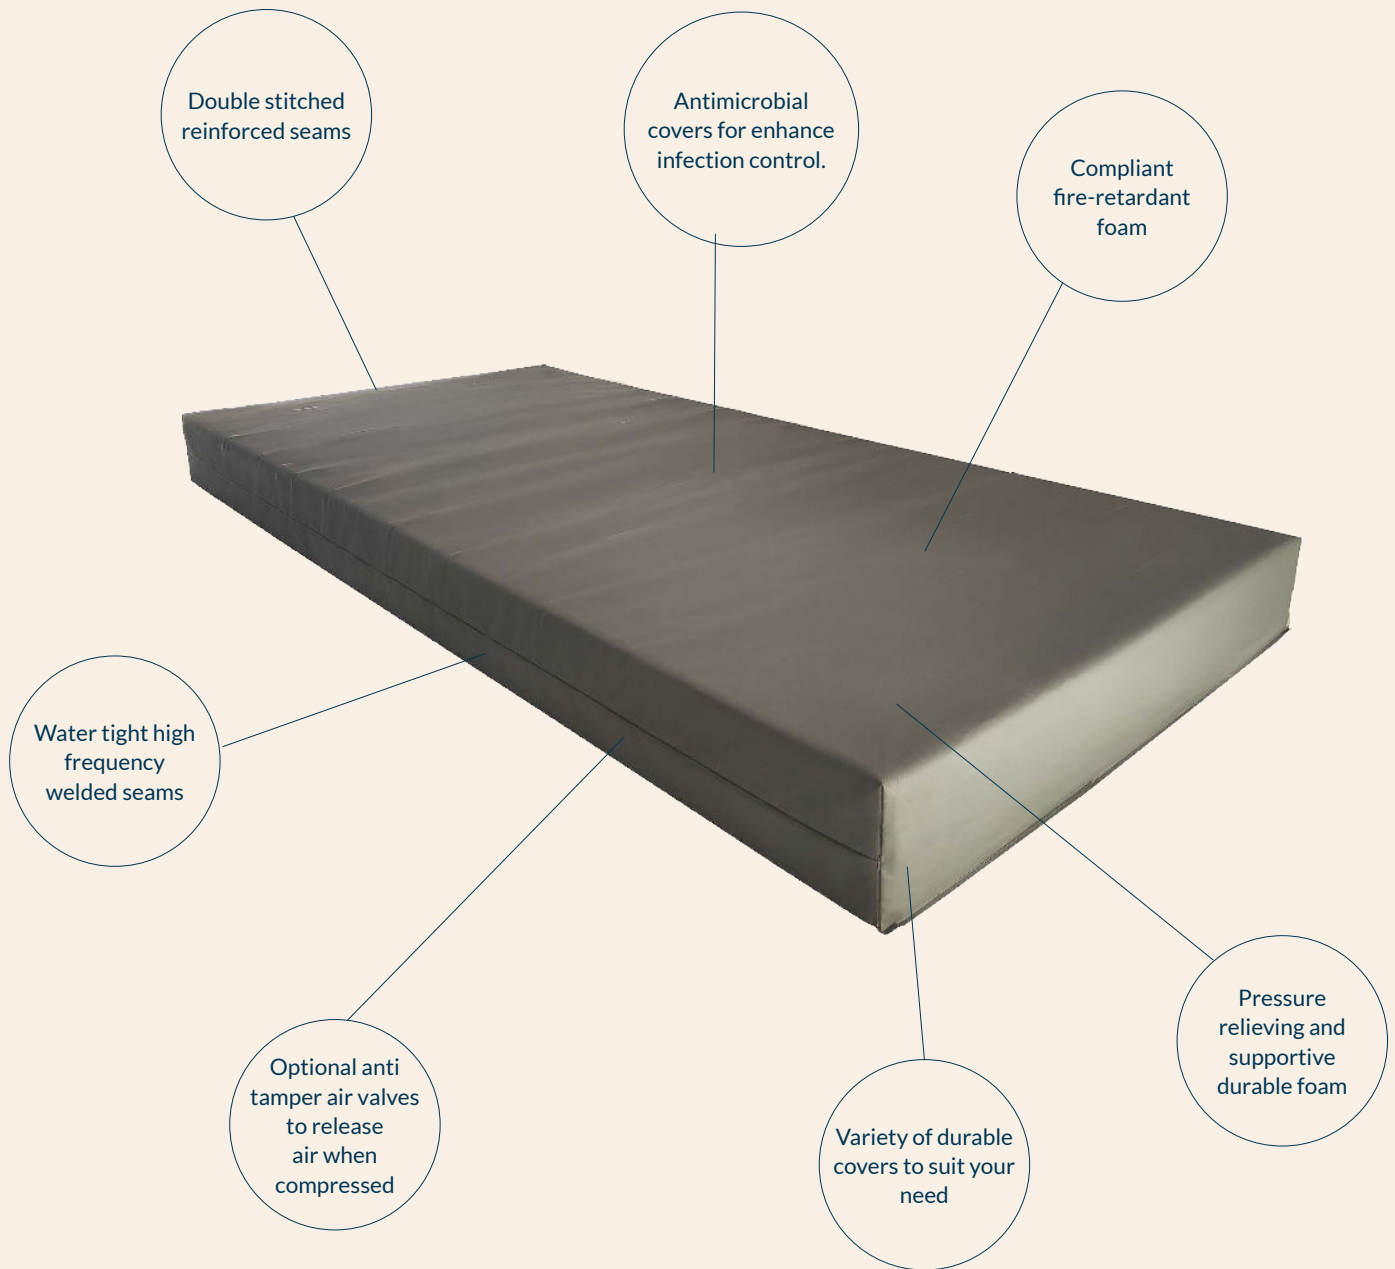

ISO CERTIFICATION

Crown Furniture has obtained ISO certifications for Quality Management (ISO 9001), Environmental Management (ISO 14001), and Work Health & Safety (ISO 45001), demonstrating our commitment to delivering quality products and services while prioritising the health, safety, and environmental impact of our operations.

Construction

Medi-Ply vs Melamine.

When designing furniture for challenging environments, our goal is to provide peace of mind whilst never sacrificing comfort or style.

Mental health furniture needs to be strong, durable and above all safe, but it should also be homely, familiar, ergonomic and provide comfort and that's the Crown Furniture difference.

- / **Durability:** Medi-Ply is strong and durable, resisting warping and cracking
- / **Natural Aesthetic:** natural wood grain gives a rustic look, while melamine is smoother and manufactured
- / **Sustainable:** Medi-Ply is eco-friendly with wood veneers, while melamine uses resin with chemicals
- / **Customisable & repairable:** Medi-Ply offers easy customisation, while melamine is limited

Beds

We all know the importance of a good night's sleep – but especially so in a mental health environment.

Our range of beds provide comfort, care and compliance with solutions for low-high risk care, rehabilitation and general in-patient use, including pieces designed for seclusion and de-escalation spaces.

Product Features

Look for these symbols throughout the brochure for a quick and easy way to check product specification, features and options.

STANDARD FEATURES

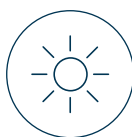

Anti-ligature

Eliminating attachment points and loops minimises the potential for ligature or self-harm and reduces the risk of weaponisation.

Secure & Safe Finishes

From highly durable foam and antimicrobial fabrics to fire retardant materials and concealed zippers, every detail has been considered to ensure safety.

Outdoor

Enjoy the outdoors with durable furniture pieces thoughtfully designed and constructed to withstand the elements.

Anti-microbial

Kill or slow the spread of microorganisms with hygienic, hypoallergenic, stain-resistant, and non-irritating materials designed for healthcare environments.

Elderly

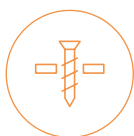

Every curve, contour, depth, recline and seat height has been carefully considered to ensure safety and comfort for elderly patients.

OPTIONAL UPGRADES

Weighting

Customise the weight to reduce the risk of furniture being thrown or weaponised.

Floor or Wall Fastening

Eliminate the worry of furniture being moved or misused, keeping pieces in the required position at all times.

Welded Seams

Offering superior fluid retention and enhanced cleaning abilities compared to traditional sewn seams.

Enclosed Base

Minimise stash points and avoid waste build up with enclosed or plinth base designs.

Anti-stash Upholstery

Avoid the concealment of contraband with minimal or zero-depth seams.

Suitable Environments

Low Risk

Suitable for reception, outpatient services, step-down & recovery.

Low to Medium Risk

Reinforced products for environments where enhanced robust specification is required.*

Low to High Risk

Weighted, reinforced products for environments where intentional throwing and furniture damage is likely to occur.

*Added weighting can make medium risk products suitable for a high risk environment. Please contact us for further details.

Mental Health Beds

A mental health bed is a specialised bed designed to provide a safe and therapeutic environment for individuals experiencing mental health issues. Here are a few key features typically found in mental health beds:

- / **Safety and Security:**
Mental health beds focus on safety, featuring sturdy construction, no sharp edges and protrusions to reduce self-harm risk. Enhanced security is achieved through reinforced frames and tamper-proof fasteners.
- / **Impact Resistance:**
Durable materials in mental health beds withstand impact, with reinforced frames, headboards and footboards ensuring safety even during force.
- / **Easy Monitoring and Observation:**
Designed to enable patient monitoring, these beds may incorporate clear visibility features like low side panels and large shallow storage compartments.
- / **Ergonomics and Comfort:**
Ensuring individual well-being and comfort, mental health beds incorporate ergonomic designs, adjustable positions and comfortable mattresses for quality sleep and relaxation.
- / **Hygiene and Cleanliness:**
Hygiene is prioritised in mental health beds with easy-to-clean features, like waterproof PVC covers antimicrobial surfaces and smooth non-porous materials.
- / **Accessibility and Mobility:**
Certain mental health beds offer adjustable heights, aiding patient transfers from medical equipment or wheelchairs. Lockable casters allow easy mobility within healthcare facilities.
- / **Compatibility with Accessories:**
Mental health beds are adaptable with various accessories like side tables, bedheads & storage compartments, customising patient care. Beds may differ to meet specific needs and facility standards.

Robust Qbik Box Bed

Ryno

Ryno products are made to the highest standards and designed to withstand the harshest treatment.

While this makes Ryno a premium product range, we believe they represent true value for money over their extended lifetime.

Lifetime guarantee: Ryno products' 10mm material wall thickness and resilient one-piece construction mean we are able to offer a lifetime guarantee against manufacturing faults.

Hygienic: Ryno products are anti-bacterial (even beneath the surface) thanks to our unique polymer blend. Their water-resistant nature means they can easily be wiped clean and dry quickly, ready to be used again.

Weighted: Optional ballast can be added to all Ryno products to improve safety, prevent misuse and discourage removal.

Floor/wall fixed: Products can be fixed to walls/floors with heavy duty anti-tamper fixings to create a secure environment.

Non-flammable: Ryno products are compliant with flammability standards.

*Added weighting can make medium risk products suitable for a high risk environment. Please contact us for further details.

Mattresses Foam

What you need to know

Crown Furniture specialises in personalised mattresses for varying levels of care. Our mattresses feature durable, tamper-resistant covers that promote longevity, infection control, and compliance with relevant standards.

We offer various foam options, catering to various pressure care levels, rehabilitation, seclusion/de-escalation, and general in-patient use. With a focus on mental health and correctional environments, our foam and cover selection ensure exceptional performance and adherence to specific requirements.

What's Inside

There are 2 key options of foam to choose from, firstly our standard convoluted foam option, and secondly the triple layered foam as our premium design.

< **Convoluted Foam**

Convoluted foam is often used in mattresses to enhance pressure relief and comfort. It is designed with a unique surface pattern that resembles an egg crate or series of peaks and valleys.

Key features:

- / Pressure redistribution
- / Enhanced airflow and breathability
- / Improved motion isolation
- / Enhanced comfort and cushioning

< **Triple Density Foam**

Layered foam of different densities holds advantage in its ability to distribute weight and reduce pressure points as each layer contributes to specific function.

Layer breakdown

- / **Supportive Base Layer:** High density foam for stable foundation
- / **Transition Middle Layer:** Medium-density foam, a smooth transition between the base layer and the comfort layer
- / **Comfort Top Layer:** Memory foam, contours to the body's shape. For pressure relief to sensitive areas such as the hips, shoulders and joints

Mattress Cover

Key Features:

- / Air valves to release air
- / Fully welded and double stitched seams
- / Anti-microbial compliant covers

Crown Furniture offers three options for mattress covers, each designed to cater to different care environments.

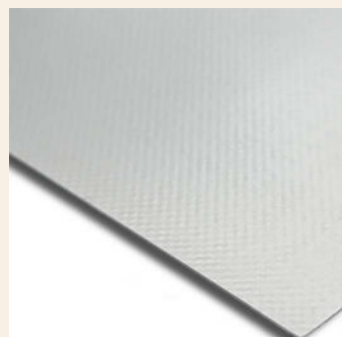

< **ProTec Cover**

Rated at 250GSM (grams per square meter). This ultra-thane cover provides a lightweight yet durable solution that is suitable for moderate care environments. The 4 way stretch allows for maximum comfort

< **ElitePlus PVC Cover**

Rated at 600GSM. This cover is made from a high-quality polyvinyl chloride (PVC) material, providing enhanced durability and resistance to liquids. This cover is designed for high care mental health environments.

< **UltraSpec PVC Cover**

Either 800GSM and 1100GSM. This cover is specifically designed for the highest care environments, such as correctional facilities. The higher GSM ratings ensure maximum protection against wear and tear, punctures, abrasions, intense usage and rough handling.

ProTec Mattress

Infection Control

We understand the importance of fit-for-purpose furniture and the increasing demands on healthcare operators to maintain a clean and safe environment for patients, staff, and visitors.

Considering the susceptibility of patients to contracting infections and our commitment to continuous improvement, we pay special attention to infection control which helps to reduce the risk of the spread of harmful bacteria and viruses, promoting a healthier and safer environment for all.

Antimicrobial Furniture Coating

Furniture in healthcare environments is an essential element to providing quality care.

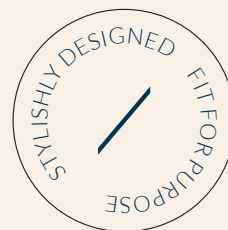

All timber furniture is polished with a durable lacquer with a bio-guard additive to meet healthcare infection control requirements.

The use of the silver additive in this coating has been proven to reduce the growth of food borne bacteria such as E.Coli, Salmonella, and Campylobacter by 99.99%.

With a coating capable of reducing the spread of infection on all timber surfaces provides assistance to task of infection control for facility operators.

Fit for purpose upholstery

All upholstery recommended are healthcare grade fabric & vinyl. We recognise the need of durability & longevity in challenging environments - textiles need to have a contract grade durability rating above 50,000 Martindale rubs. All materials are moisture barrier and anti-microbial.

Custom Built-in Furniture

Crown Furniture, a leading name in the industry, possesses unparalleled expertise in crafting custom-built joinery solutions for mental health facilities. Their innovative approach centers around using a diverse range of materials, with HPL birch Medi-Ply at the forefront. This robust and versatile material ensures the highest level of quality and longevity in the most demanding environments.
