Mental Health Furniture

About Us

**We've been crafting
furniture for over 20 years.**

In those years a lot has changed; we've developed new products, new processes, and forged new markets.

But, one thing has always remained the same – our promise to deliver products that will help you to provide the best quality of care to your patients.

Our Service Commitment

Crown Furniture is a third generation family-owned business. We care for our customers and their needs as if they were our own family. We include the following as part of our service to you:

AUSTRALIAN MADE AND OWNED

Our team has extensive experience in furniture and cabinet making. We are skilled craftsmen who advise on best practice and best design, for every situation.

OUR QUALITY STANDARDS

At Crown Furniture we pride ourselves on quality, that's why we work to the best in Australian standards in compliance & warranty guarantee.

OUR GUARANTEE

We offer a structural warranty, however coverage may be limited or altered based on the environment in which the product is used.

CHOOSE YOUR FINISHES

We offer an interior design service to develop your space through our expertise and knowledge.

ISO CERTIFICATION

Crown Furniture has obtained ISO certifications for Quality Management (ISO 9001), Environmental Management (ISO 14001), and Work Health & Safety (ISO 45001), demonstrating our commitment to delivering quality products and services while prioritising the health, safety, and environmental impact of our operations.

Secure

Rethinking challenging environments.

When designing furniture for challenging environments, our goal is to provide peace of mind whilst never sacrificing comfort or style. Mental health furniture needs to be strong, durable and above all safe, but it should also be homely, familiar, ergonomic and provide comfort and that's the Crown Furniture difference.

Lounges

Create a soothing atmosphere that helps patients feel relaxed and at ease, creating a calming oasis where patients can enjoy some quiet time with minimal distractions or enjoy social interaction and community-building with staff and fellow patients.

This range of comfortable, easy-to-maintain furniture and calming décor has been designed to enhance comfort whilst ensuring safety and function.

Product Features

Look for these symbols throughout the brochure for a quick and easy way to check product specification, features and options.

STANDARD FEATURES

Anti-ligature

Eliminating attachment points and loops minimises the potential for ligature or self-harm and reduces the risk of weaponisation.

Secure & Safe Finishes

From highly durable foam and antimicrobial fabrics to fire retardant materials and concealed zippers, every detail has been considered to ensure safety.

Outdoor

Enjoy the outdoors with durable furniture pieces thoughtfully designed and constructed to withstand the elements.

Anti-microbial

Kill or slow the spread of microorganisms with hygienic, hypoallergenic, stain-resistant, and non-irritating materials designed for healthcare environments.

Elderly

Every curve, contour, depth, recline and seat height has been carefully considered to ensure safety and comfort for elderly patients.

OPTIONAL UPGRADES

Weighting

Customise the weight to reduce the risk of furniture being thrown or weaponised.

Floor or Wall Fastening

Eliminate the worry of furniture being moved or misused, keeping pieces in the required position at all times.

Welded Seams

Offering superior fluid retention and enhanced cleaning abilities compared to traditional sewn seams.

Enclosed Base

Minimise stash points and avoid waste build up with enclosed or plinth base designs.

Anti-stash Upholstery

Avoid the concealment of contraband with minimal or zero-depth seams.

Suitable Environments

Low Risk

Suitable for reception, outpatient services, step-down & recovery.

Low to Medium Risk

Reinforced products for environments where enhanced robust specification is required.*

Low to High Risk

Weighted, reinforced products for environments where intentional throwing and furniture damage is likely to occur.

*Added weighting can make medium risk products suitable for a high risk environment. Please contact us for further details.

Standard Features:

Options:

Simple, stylish and functional, the compact size of this lounge allows you to enjoy it anywhere.

1350W x 708D x 800mmH x 440SH

Low to High Risk

Minimal depth seams in lounges are crucial for maintaining a safe and secure environment. These seams prevent the stashing of contraband and minimise the risk of transfer of dangerous goods and illicit substances.

The use of minimal depth seams ensures that there are no gaps or spaces where items can be hidden. This makes it easier for security personnel to identify and confiscate any illicit materials that may be brought into the lounge. Additionally, minimal depth seams can reduce the risk of contamination, as they prevent the transfer of particles through gaps in the seams.

< Robust Connect Single Lounge

Standard Features:

Options:

A cosy place to stop and rest with hidden safety features, designed to comfort, support and provide peace of mind.

900W x 770D x 890mmH x 460SH x 530SD x 640AH

3 Seater: 1820W x 730D x 780mmH x 450SH

Low to High Risk

Advantages of Solid Plinth Bases on Mental Health Lounges:

Reduce cleaning requirements by preventing dirt and debris accumulation underneath the lounge.

Improve cleanliness and hygiene, which is crucial for patient health and safety in mental health settings.

Provide a sturdy foundation that helps prevent lounges from being flipped or misused, improving safety for patients and staff.

Overall, enhance the cleanliness and safety of the environment in mental health facilities.

Significantly reduce the risk of contraband stashing, as there is no space under the lounge for patients to hide prohibited items.

Flexible Seating

Whether its a sensory or deescalation room, Modular or multipurpose setting these pieces are designed to be adaptable for any environment.

With the ability to split into separate parts, you have the ability to reconfigure spaces with ease – from individual seats to large sofas designed to encourage communication and collaboration in communal areas.

Product Features

Look for these symbols throughout the brochure for a quick and easy way to check product specification, features and options.

STANDARD FEATURES

Anti-ligature

Eliminating attachment points and loops minimises the potential for ligature or self-harm and reduces the risk of weaponisation.

Secure & Safe Finishes

From highly durable foam and antimicrobial fabrics to fire retardant materials and concealed zippers, every detail has been considered to ensure safety.

Outdoor

Enjoy the outdoors with durable furniture pieces thoughtfully designed and constructed to withstand the elements.

Anti-microbial

Kill or slow the spread of microorganisms with hygienic, hypoallergenic, stain-resistant, and non-irritating materials designed for healthcare environments.

Elderly

Every curve, contour, depth, recline and seat height has been carefully considered to ensure safety and comfort for elderly patients.

OPTIONAL UPGRADES

Weighting

Customise the weight to reduce the risk of furniture being thrown or weaponised.

Floor or Wall Fastening

Eliminate the worry of furniture being moved or misused, keeping pieces in the required position at all times.

Welded Seams

Offering superior fluid retention and enhanced cleaning abilities compared to traditional sewn seams.

Enclosed Base

Minimise stash points and avoid waste build up with enclosed or plinth base designs.

Chairs

From dining rooms and lounges to bedrooms and sensory areas, our range of chairs has been carefully designed to provide an option for every space.

From the indestructible Ryno range to the stylish Robust Fuso Side Chair, we will work with you to create the perfect chair for your needs.

Product Features

Look for these symbols throughout the brochure for a quick and easy way to check product specification, features and options.

STANDARD FEATURES

Anti-ligature

Eliminating attachment points and loops minimises the potential for ligature or self-harm and reduces the risk of weaponisation.

Secure & Safe Finishes

From highly durable foam and antimicrobial fabrics to fire retardant materials and concealed zippers, every detail has been considered to ensure safety.

Outdoor

Enjoy the outdoors with durable furniture pieces thoughtfully designed and constructed to withstand the elements.

Anti-microbial

Kill or slow the spread of microorganisms with hygienic, hypoallergenic, stain-resistant, and non-irritating materials designed for healthcare environments.

Elderly

Every curve, contour, depth, recline and seat height has been carefully considered to ensure safety and comfort for elderly patients.

OPTIONAL UPGRADES

Weighting

Customise the weight to reduce the risk of furniture being thrown or weaponised.

Floor or Wall Fastening

Eliminate the worry of furniture being moved or misused, keeping pieces in the required position at all times.

Welded Seams

Offering superior fluid retention and enhanced cleaning abilities compared to traditional sewn seams.

Enclosed Base

Minimise stash points and avoid waste build up with enclosed or plinth base designs.

Anti-stash Upholstery

Avoid the concealment of contraband with minimal or zero-depth seams.

Suitable Environments

Low Risk

Suitable for reception, outpatient services, step-down & recovery.

Low to Medium Risk

Reinforced products for environments where enhanced robust specification is required.*

Low to High Risk

Weighted, reinforced products for environments where intentional throwing and furniture damage is likely to occur.

*Added weighting can make medium risk products suitable for a high risk environment. Please contact us for further details.

Ryno

Ryno products are made to the highest standards and designed to withstand the harshest treatment.

While this makes Ryno a premium product range, we believe they represent true value for money over their extended lifetime.

Lifetime guarantee: Ryno products' 10mm material wall thickness and resilient one-piece construction mean we are able to offer a lifetime guarantee against manufacturing faults.

Hygienic: Ryno products are anti-bacterial (even beneath the surface) thanks to our unique polymer blend. Their water-resistant nature means they can easily be wiped clean and dry quickly, ready to be used again.

Weighted: Optional ballast can be added to all Ryno products to improve safety, prevent misuse and discourage removal.

Floor/wall fixed: Products can be fixed to walls/floors with heavy duty anti-tamper fixings to create a secure environment.

Non-flammable: Ryno products are compliant with flammability standards.

Hush Acoustic Tile

Add style whilst improving acoustics and minimising the effects of excessive noise to create a calmer, more therapeutic space.

Shaped to minimise
ligature risks and
prevent climbing

Secured without
fixings for safety

Acoustic Benefits

Hush® tiles are carefully designed to reduce excessive noise levels, reducing reverberation time by absorbing sound waves.

Without Hush - reverberation 5.57 seconds

With Hush - reverberation 3.07 seconds

Test: 500Hz noise signal

Cork **absorbs sound** and noise vibrations by trapping sound waves in its honeycomb air-filled cell structure.

The **angled faces** are designed to diffuse sound waves, distributing them throughout a space.

Air pockets at the rear help to trap and further reduce sound waves reflected back through the tile.

Infection Control

We understand the importance of fit-for-purpose furniture and the increasing demands on healthcare operators to maintain a clean and safe environment for patients, staff, and visitors.

Considering the susceptibility of patients to contracting infections and our commitment to continuous improvement, we pay special attention to infection control which helps to reduce the risk of the spread of harmful bacteria and viruses, promoting a healthier and safer environment for all.

Antimicrobial Furniture Coating

Furniture in healthcare environments is an essential element to providing quality care.

All timber furniture is polished with a durable lacquer with a bio-guard additive to meet healthcare infection control requirements.

The use of the silver additive in this coating has been proven to reduce the growth of food borne bacteria such as E.Coli, Salmonella, and Campylobacter by 99.99%.

With a coating capable of reducing the spread of infection on all timber surfaces provides assistance to task of infection control for facility operators.

Fit for purpose upholstery

All upholstery recommended are healthcare grade fabric & vinyl. We recognise the need of durability & longevity in challenging environments - textiles need to have a contract grade durability rating above 50,000 Martindale rubs. All materials are moisture barrier and anti-microbial.

Custom Built-in Furniture

Being an Australian manufacturer allows greater control on quality, lead times & custom make items to your specific requirements. Pictured is a custom built-in seating unit at Mater Hospital, Newcastle.

Robust Upholsteries

Selecting appropriate upholstery is crucial when choosing furniture for mental health environments.

At Crown Furniture, we understand the importance of using vinyls and fabrics that are specifically suited to the space in question. Our vinyls are a popular option due to their durability and practicality. They are all anti-microbial, waterproof, and easy to clean, which is essential in ensuring the safety of patients and staff by preventing infections.

In addition to the traditional vinyl options, we have partnered with suppliers who specialise in textured and patterned vinyls that are both practical and visually appealing. These options are perfect for creating a more inviting atmosphere in mental health spaces, moving away from the traditional sterile look of vinyls. Alternatively, our digitally printed moisture barrier fabrics are available in a variety of custom colors and designs. Depending on the level of care required in different areas, we recommend different base cloths with varying properties to meet the specific needs of our clients.

To learn more about our range of vinyls and materials for your space, please contact one of our professional consultants at Crown Furniture who will guide you in selecting the perfect fit for your needs.

Delivery & Placement

Delivery & Placement

Our care and attention doesn't stop once your furniture is made.

Our dedicated logistics team stay in touch with you every step of the way – ensuring your products are delivered and installed with the same care in which they were crafted.

Since our manufacturing is local, this gives us greater control of lead times allowing on-time delivery and placement.

We help you create an incredible environment for your patients, while making your life easier.
